China plays an important role as garlic producer, exporter and consumer, seeing its annual production and export taking over 70% of the world total. On the purpose of strengthen exchanges and cooperation on garlic business between China and the world, "CHINA GARLIC 2019" has positioned itself an international professional event, offering the world industry a dynamic platform of communication.

The fresh garlic market around the world.

During last year of 2018, the world garlic production was more than 30 million tones, and China accounting for 80% of the total (per the following table).India was the second largest producer with no more than 6% of total production.

Via the data we can note that the most amount of fresh garlic come from China, at the same time the price is controlled by the market in China, especially by the garlic capital Jinxiang County, which located at the Shandong Province.

--	--	--	--

Country	Production (Millions of MTs)	Percentage
China	25.06	83.5%
India	2.8	9.3%
Bangladesh	0.9	3.0%
Egypt	0.65	2.2%
South Korea	0.29	1.0%
Russia	0.3	1.0%

### Why the garlic from China is popular around the world?

-There is a whole industrial chain for kinds of garlic product. Once you visit the garlic capital, Jinxiang County, most of the farmer plant the garlic and do the package in the factory. Each type of service concerning garlic export are mature. This is the key for the competitive cost.

- China garlic cultivation dates back to a long period, we can say it have been brought from Middle East about 2000 years ago, and locally named as Da Suan. During the long time planting, the smart farmers are well known how to grow the excellent garlic.

- Garlic grows better in the regions with temperature variation from 13 ° to 25 °. Particularly when grown in sandy soils, that's exactly the situation in some area of China.

-Most of people like the garlic not only it is a nutritious vegetables and mandatory used in all over the world, but also the dish is not easy to avoid the garlic flavor.
